**Stevi Morton**  
Chief Information Officer  
Providence Health & Services Alaska  
**\$1.8M savings over 2 years**

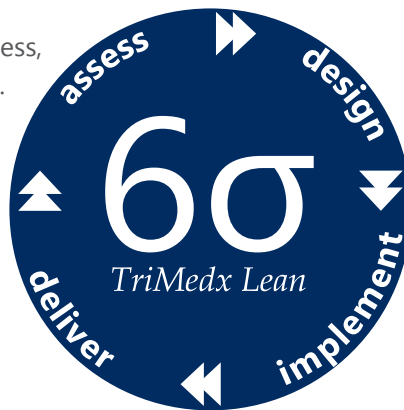

## streamlining people, processes and technology

TriMedx partners with healthcare providers to assess, design, implement and deliver positive outcomes. Through every phase of the process lean and six sigma-certified managers collaborate with clients to reduce expenses, optimize service and enhance revenue.

TriMedx is not a manufacturer, which allows its knowledgeable technicians, engineers and consultants to take an unbiased approach providing impartial analyses for capital equipment and parts procurement. What's more – TriMedx RSQstratus™, the company's proprietary equipment network – manages 300,000 devices with a total value of more than \$3.5 billion, allowing users to:

- track and document equipment inventory
- conduct spend and trend analysis
- generate on-demand reports for regulatory compliance and much more

Former biomedical technician Greg Ranger, founder, president and CEO of TriMedx, envisioned an organization that positively impacts healthcare. Managing medical equipment so healthcare providers can focus on patient care, TriMedx is guided by an intense vision to be the most trusted service partner in healthcare.

TriMedx, a leader in medical equipment management, collaborates with healthcare providers to reduce expenses, optimize service and enhance revenue. Headquartered in Indianapolis, what started as a hospital clinical engineering department today serves over 500 healthcare facilities nationwide. Since 2007, TriMedx has ranked as a top healthcare equipment management company by *Modern Healthcare*. In 2010, TriMedx was named one of the Top 100 Best Places to Work in Healthcare by *Becker's Hospital Review*. To learn more, visit [www.trimedx.com](http://www.trimedx.com).

## TriMedx Foundation

Living out its "service of the poor" core value, TriMedx sends technicians and engineers to communities in need to help repair, install and train locals to maintain life-saving medical equipment. Since 2004, TriMedx Foundation has supported more than 50 mission trips to 18 countries around the world.
