

A woman with long dark hair, smiling, wearing a purple TRIMEDX button-down shirt. The background is a blurred office setting with yellow and blue dotted lines overlaid.

**CLINICAL ENGINEERING**

# TRIMEDX CLINICAL ENGINEERING **LEADERSHIP PROGRAM**

## **LEARN FROM SOME OF THE BEST.**

TRIMEDX delivers clinical engineering services, clinical asset informatics, and medical device cybersecurity to health systems across the country. Leadership is critical to our ability to adapt and grow in this evolving industry. We provide our leaders with the tools and resources they need so they are empowered to make decisions, take risks, and lead their teams. We strive to develop the industry's most talented clinical engineering leaders. The TRIMEDX Clinical Engineering Leadership Program helps new managers transition into the role and learn from experienced managers.

# ADVANCE YOUR LEADERSHIP CAREER.

The TRIMEDX Clinical Engineering Leadership Program provides new graduates and clinical engineering experts the opportunity to train up to 12 months at one of our designated training sites. They are mentored by some of our strongest leaders with the goal of becoming a clinical engineering site manager. Participants will also be able to travel to various sites for additional training and development. Associates are challenged to learn and excel at responsibilities such as people leadership, business negotiation, communication, finance, clinical engineering operations, customer service, and more.

**Successful graduates of the program** will then match their skills to available clinical engineering opportunities, and relocation is likely required.

## QUALIFICATIONS

Candidates should have a minimum of a bachelor's degree (technical-, engineering-, or business-related degrees), demonstrate a strong desire to join a management career path, and must be willing and able to relocate. A basic understanding of clinical engineering services is highly preferred. Being an entrepreneurial-minded professional is an absolute must.

## WHY TRIMEDX?

|   |                      |
|---|----------------------|
|  | Values-based culture |
|  | Growth opportunities |
|  | Training             |

## SPEND TIME WHERE IT MATTERS MOST.

Clinical Engineering leaders are action-oriented problem solvers, but administrative tasks can be a burden on their team's time. With TRIMEDX's innovative technology, centralized support teams, and focus on continuous improvement, technicians can spend more of their time dedicated to service—the part they enjoy most.
